PROFILE

Final-year Computer Science student at Pan-Atlantic University (Second Class Upper, graduating December 2026) with four completed internships across full stack development and enterprise IT. Ships features end to end: Spring Boot and PostgreSQL on the backend, React and Next.js on the front, secured with JWT. Designed and implemented a hybrid AHP-TOPSIS multi-criteria decision engine for a budget-aware meal planning platform. Returned for a second summer at CSDC Systems Solutions on the strength of the first. Available immediately for internships, industrial attachment and contract work; full-time from January 2027.

TECHNICAL SKILLS

Languages Java, JavaScript, TypeScript, SQL

Frontend React.js, Next.js, HTML5, CSS3, Tailwind CSS, responsive design

Backend Spring Boot, Spring Data JPA, Node.js, REST API design, JWT authentication

Databases PostgreSQL, MongoDB, Firebase

Tools & Platforms Git, GitHub, Docker, Postman, Swagger/OpenAPI, VS Code, Active Directory

Concepts MVC architecture, system design fundamentals, authentication & authorisation, Agile team delivery

EXPERIENCE

Full Stack Developer Intern (Returning) | CSDC Systems Solutions Limited *Jul – Sept 2024 | Jul – Sept 2025*

- Designed the backend architecture for an internal ticketing system in **Spring Boot**, structuring **10+ RESTful endpoints** and the authentication workflow securing them.
- Built and maintained REST APIs against **PostgreSQL**, implementing CRUD operations with **Spring Data JPA** over a dataset of **1,000+ records**.
- Developed responsive **React.js** components and web templates, eliminating cross-device layout defects and standardising UI behaviour across breakpoints.
- Worked through the full delivery cycle with the development team — code review, integration and milestone hand-off — and was invited back for a second summer.

IT Support Intern | CWG PLC *Jul – Sept 2025*

- Administered **50+ user accounts** in **Active Directory**, covering provisioning, access control and permission audits.
- Monitored and managed organisation-wide endpoints using **Sophos** and **ManageEngine**.
- Founded and led “Tech Tuesday”, a weekly internal training session attended by **15+ staff**.
- Triaged and resolved hardware and software incidents, reducing downtime for affected teams.

Web Development Intern | Monospace Digital *Aug – Sept 2023*

- Built and delivered a client-facing website end to end, increasing the client's online engagement.
- Gathered and analysed user feedback, then implemented the resulting interface changes.
- Researched emerging technologies and supported product marketing initiatives.

PROJECTS

Smart Meal Planner (SmartMeal) | Next.js, Firebase, Tailwind CSS *Final-year project*

- Full-stack platform generating personalised, budget-aware meal plans; validated against **100+ simulated user profiles**.
- Implemented a **hybrid AHP-TOPSIS multi-criteria decision algorithm** that ranks meal options against weighted user constraints, replacing a rule-based baseline that could not handle competing priorities.
- Integrated real-time data handling through Firebase for live plan generation and updates.
- Built a fully responsive interface tested across mobile, tablet and desktop breakpoints.

Student Council Website | React, REST APIs *Pan-Atlantic University*

- Dynamic platform for university-wide student communication and engagement, built for the Student Council Tech Team.
- Optimised API call patterns and frontend rendering to cut page load time.

Weather Application | JavaScript, third-party APIs [live demo](#)

- Forecasting app consuming external weather APIs, serving real-time requests with **sub-2-second response times**.
- Dynamic UI updates driven by user input and live API responses.

GConnect | Social Media Web App *Personal project*

- Social interface supporting core user interactions — posts, feeds and live UI updates.
- Built a reusable component library that shortened build time for each subsequent feature.

EDUCATION

BSc Computer Science | Pan-Atlantic University, Lagos *Expected Dec 2026*

- Academic standing: **Second Class Upper (2:1)**.
- Final-year project: hybrid AHP-TOPSIS recommendation engine for budget-constrained meal planning.

LEADERSHIP & VOLUNTEERING

Resident Assistant | Guidance & Counselling Unit, Pan-Atlantic University *Aug 2024 – Present*

- Support student welfare and coordinate residential activities for **100+ students**.

Welfare Officer I | Pan-Atlantic University *Feb – Dec 2025*

- Led welfare initiatives and coordinated programmes reaching **200+ students**.

Member, Student Council Tech Team | Pan-Atlantic University *Jun 2024 – Mar 2025*

- Built and maintained the digital platforms supporting student engagement across the university.

ADDITIONAL

- **Certification:** Industry Readiness Programme (Nov 2023).
- **Availability:** internships, industrial attachment and contract work immediately; full-time from January 2027, subject to NYSC placement.
- **Interests:** full stack development, system design, and data-driven decision systems.
